We are developing, with the World Peace Garden Trust, a Peace Garden in Hampstead. A narrow strip of land sandwiched between a main road and the Overground Rail service will contain a tiled mosaic which will contain many peoples vision of what will constitute "World Peace". The public will be asked to donate an image, to be converted into a tile, and 50 words which will make up the mosaic. A live link video camera will project the mosaic onto the Internet, where the world can view and focus in on each contribution together their caption. The aim is to develop the garden and then role out the template to other cities. Planning permission was granted in 2009.
