

W i l d g o o s e - A n i n t e r p r e t a t i v e v i s i o n

Moving a diverse community from its present crowded site to...

I bee-lieve

...pastures new (containing unique geology, archaeology, habitats and wildlife).

We have stories to tell!

Wildgoose - An interpretative vision

We will explore our place, our community and our natural environment, to demonstrate more equitable living for people and for nature.

Using the skills of the community to create memorable interpretation

What is here on the site?

Understand the importance of natural connections

Who we are?

Finding equitable ways of living together

What we do?

Living here thru' the seasons

Who lives here with us?

Finding better ways of people and nature co-existing

What has happened here before?

Take lessons in living from the past

What is the land we stand on?

The rocks that formed this place

What lessons can we learn from here?

Inspire profound and sustainable changes for us and for nature

Wildgoose - An interpretative vision

As with the new build - the community will...

Help design the interpretive experience to build, draw, nurture, star in it and record it, become part of it and share it with others.

The community will shape the interpretation...

...using a variety of media

They will build the interpretation

They will build structures from the past

They will record the development of the site

Low Tech

- Site trails and brochures for adults and kids
- Site panels (some lenticular).
- Simple interactives and activities

High tech

- Community filming
- Drone filming of landscapes
- Time lapse photography
- Developing an interactive App
- Online

Wildgoose - An interpretative vision

Evidence shows that honey bees in the UK from around **4,000 years ago** up until the 19th century were genetically the dark European honey bee - *Apis mellifera mellifera*.

Using the bee as a strong analogy that will engage the community and act as a vehicle for communicating the ethos of this unique place to others, this introductory exhibit could become a memorable linking mechanism for all the interpretation on the site

The Wildgoose community will build **the exhibition bee hive** in the visitor centre and tell connecting stories of...

Wow!
My 4000 year
old history

An indoor viewing hive

Living in a **community**

Communicating to others

Surviving over **seasons**

Enjoy and share in the produce

Interdependency vital to self and others

**Explore the Habitats
the Heritage and Geology**

Wallow in the **beauty** of the place

Look at the past and care for **what happens in the future**

Over the past 30 years there has been a huge increase in queen bee imports to the detriment of our British native dark bee. Stocks of 100% pure native dark bees are dangerously low, and it is imperative that all beekeepers take action to help reinstate the original native honey bee to this country whilst there is still the opportunity.

Wildgoose - An interpretative vision

Honeycomb - strength in its shape and inter-connectivity

Home sweet home
