St Mary Decrypt Gloucester

- An Exhibition Plus Project
- Heritage Lottery Funded Project
- Interpretation Budget £50,000

The medieval church of St Mary de Crypt and adjoining Tudor Old Crypt Schoolroom are prominently positioned at the heart of the historic city of Gloucester with a varied and challenging visitor demographic. Working with the client group, the conservation architects and the people of Gloucester, we have developed a unique interpretation offer that will transform the church into a vibrant community centre and place of worship. Using both robust high tech media such as an interactive app (that will be sensitive to your movement), talking pens and a range of adjustable graphics, the offer presents a changeable exhibition magazine designed to reflect the many new activities and audiences that are using this place.

Follow 600 years of footsteps

Getting an audience

A reproduction of George Whitefield's portable pulpit will be used for performances etc - see final page...

"I was honoured with having rotten eggs and pieces of dead cat thrown at me"

Discover DeCrypt

Adjustable soundscapes

Following a centuries old tradition of the school paying a **red rose** in lieu of rent - visitors trace a rose petal trail

A talking pen enables a dramatic trail around the church, which is easily changeable, allowing for differing events and languages

Discover DeCrypt

Adjustable graphics

Flipbooks create an exhibition magazine, easy and cheap to change. The talking pens allow for staff, and visitors to modify, record and create differing experiences

A church timeline with interactive petals
