- An Exhibition Plus Project
- Heritage Lottery Funded Project
- Interpretation Budget £40,000

The medieval church of St Mary de Crypt and adjoining Tudor Old Crypt Schoolroom are prominently positioned at the heart of the historic city of Gloucester with a varied and challenging visitor demographic. Working with the client group, the conservation architects (Purcell) and the people of Gloucester we are developing a unique interpretation offer that will transform the church into a vibrant community centre. Using both robust high tech media such as an interactive app (that will be sensitive to your movement), talking pens and a range of adjustable graphics and brochures we are at present exploring options with our target audiences.
