- An Exhibition Plus project 2008
- A design scheme, build value approx £2 Million

As part of the proposed redevelopment of the Heritage Area, in which all traffic will be directed away from the area, we worked with the Sharjah Museum Department in creating a new vision and identity for the area.

"I am a friend of the friend of the sea
 And an enemy of the enemy of the land
 Between these two theres nothing but air".

= Short tower in Heritage Square will take Balloon pulley (balloon will rise and fall every 15 minutes). Also will have viewing platform. Live link camera on balloon give real time view of square on web and ground based viewing pods.

Ionic column that follows the building of a new Sharjah

YEAR 1
Gleaming column and timeline

New c

A gleaming column (seen in a vista from Al Hisn) one side will have photos of progress of the new building of the area, year by year. As each year goes by the column is dropped a bit into the ground. Other side will have comments and 'blogs' year by year. When the area building has finished the column will become a time capsule seen in the car park below and as a giant pearl above,

A new wind is blowing through the Heart of Sharjah

YEAR 10
Pearl time capsule
